

S.F.K. Components is a provider of highly mechanised, high-quality hydraulic components with classic guidings and sealing systems, special parts as well as customised individual solutions, geared towards a variety of hydraulic application industries.

In doing so, we draw upon 5 core technologies:

| Core technologies | Product type | Shape | Material |
|---|---|--|--|
| Guide elements  | Piston guiding Rod guiding Plunger guiding Bushing | standard individual | Fabric-base laminate Cotton fabric / Phenolic resin Synthetic fibre / Phenolic resin with PTFE Polyester / Polyester resin PTFE compounds Polyacetal |
| PTFE sealing  | Piston seals Rod seals Wipers Rotary sealing | single and double acting single and double acting external sealing action internal sealing action | PTFE - Bronze PTFE - Carbon fibre PTFE - Fibre glass PTFE - Food compatible compound Special materials (e.g. PEEK, Ekonol) Polyurethane PTFE - Bronze PTFE - Carbon fibre PTFE - Fibre glass PTFE - Food compatible compound Special materials (e.g. PEEK, Ekonol) |
| Hydraulic sealings  | Piston seals Rod seals Wipers | | Standard materials, such as polyurethane und NBR/FPM Special materials |
| Backup rings  | continuous spiralled slotted | | PTFE - Bronze PTFE - Carbon fibre PTFE - Fibre glass PTFE - Food compatible compound Polyurethane POM Special materials (e.g. PEEK, Ekonol) |
| Special sealing systems Spezial compounds - Individual manufacturing -  | Piston seals Rod seals Wipers Special seals Special components | single and double acting single and double acting individually designed according to requirements | Standard materials, such as Polyurethane, PTFE, NBR/FPM Polyethylene POM, PA Special materials |
